

Unisub works to make its economic and tourist development compatible with the protection of the environment and the quality of its services.

This objective is especially important to us since we carry out our activity in the heart of the Montgrí, Medes and Baix Ter Natural Park, and specifically in the surroundings of the Medes Islands.

Our objectives are to achieve full customer satisfaction and environmental protection, through continuous improvement in the provision of our services and awareness of both workers and customers about their environmental footprint and the importance of reducing it to the minimum.

We strive to maintain the competitiveness of the company by guaranteeing the prevention of pollution, controlling all aspects of our activity that may have an impact on the environment, publicizing the natural values of our environment, and integrating the interested parties in the development of our activity. .

For this reason, in 2018 we made the decision to join the ISO 14001 system. In 2020, Unisub satisfactorily passed the audit of the Tourism Quality System in Destinations (SICTED) and joined the European Charter for Sustainable Tourism (CETS). In the same year we obtained the GREEN STAR AWARE certification from PADI. In 2022 we achieved the distinction of the Generalitat for Environmental Quality. Unisub continues to renew these accreditations and continues to form part of these Management and Quality systems, to ensure the best service and maximum cohesion with the environment, aware of the responsibility involved in carrying out an activity in the middle of nature and all the more so if it is from a Natural Park such as the Medes Islands, Montgrí Baix Ter.

With this objective we continue working with the conviction that environmental management is an essential factor for any company committed to its environment and to the satisfaction of its customers, who are increasingly taking into account, when choosing an activity, its environmental footprint.

All the members of the company are involved in this premise, who through a cordial and attentive treatment, work for excellence in everything they do to provide the best level of service and information to all customers and guarantee the maintenance of the space they work in.
